

Embracing Innovation & Enhancing Global Competitiveness

17 - 21 Feb, 2020 | London (Conf.)

Competencies:

- Adding Value Through Innovation
- Enhancing Global Competitiveness
- Driving Positive Change
- Best Practices in the Workplace

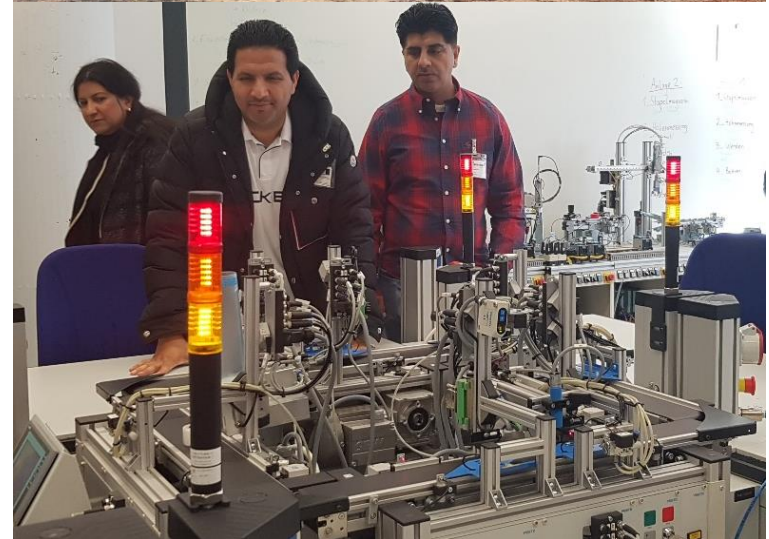

This course is designed to embrace innovative practices and enhance global competitiveness for mid to upper-level managers in the Oil & Gas industry. Discussions will be centered around innovative processes used in the workplace. Additionally, practical application methods will be considered for participants to take back to their organization.

By pairing interactive sessions and real case examples with highly engaging activities and site visits, participants will learn how leading organizations utilize innovation to become more competitive in the global market.

The highly interactive team activity enables participants to work together and solve problems while exploring downtown London. Site visits allow participants to build close networks with business leaders from various industries. These activities and visits provide key takeaways that can be applied back at their organizations.

[Expected Outcome]

- Participants will gain firsthand knowledge about adding value through innovation
- Participants will analyze different workplace practices that are simple yet innovative

"I strongly recommend this course to others. I have learned about high technology and innovation. I want to improve my team based on what I have learned."

Mohammad AlBasry, KOC, Manager
